The image features a large, multi-lane concrete bridge spanning a body of water. The bridge has several tall, rectangular concrete piers supporting it. On the right side of the image, there is a close-up view of a bridge pylon, showing its concrete structure and some cables. The water is a deep blue, and the sky is also blue. The text is overlaid on the top left of the image.

The Volvo Group, which
employs about 115,000 people,
has production facilities in
18 countries and sales of products
in more than 190 markets.

Global network of 42 production and engineering facilities

Volvo Group has a common architecture globally and shared technology – but we locally adapt our trucks to suit Australian customer and legislative requirements.

Truck maker stays on track **FINANCIAL REVIEW**

“As any large multinational company we constantly look for how to optimize our global resources. Currently we are strengthening our production and sourcing base in the APAC region. We are today manufacturing our Volvo Trucks and Mack Trucks in Australia as there are specific needs for Australian customers. Building Australian trucks for Australian customers is a good business that contributes to customer satisfaction and have no plans to cease local manufacturing in Australia.”

Tommy Kohle - SVP Communications, Volvo Trucks
1 December 2013
